Studies Python (programming language) & C++ (programming language) (Expected 2026) · Sun

Is Python a powerful language? Why is it rarely taught to students at the Indian Institutes of Technology (IIT)?

A Python script isn't compiled first and then executed. Instead, it compiles every time you execute it, so any coding error manifests itself at runtime. This leads to poor performance, time consumption, and the need for a lot of tests. However, it [pro \(more\)](#)

Why does Google use Python instead of Java for its servers/projects?
The Python language allows for speedy deployment, scalability, easy maintenance, and readability making it the preferred language of choice for tech companies like Google. Python is more versatile, easier to read, and has a simpler syntax. Accor (more)
